

Since moving to St. Charles with my husband Gary in 2004, I have been involved with a number of boards and non-profit organizations. Each of those experiences has reinforced for me what a great decision we made when we moved to St. Charles 16 years ago.

My current work as the Board Secretary and Fundraising Chair with the St. Charles River Corridor Foundation has been extremely rewarding. Our board has accomplished a number of important initiatives including improvements to the Fox River shoreline, installation of the river-walk, new sculptures, and additional amenities. I lead the Legacy Brick Program and have co-chaired and been instrumental in the success of events in St. Charles including the Heart of the Fox, Project Daffodil, and the Fox River Clean-up. I am also involved with the St. Charles Chamber of Commerce and the Brownstone Homeowners Association, where I serve as Board President. In addition, I support a number of local non-profits throughout the community.

The breadth of these experiences has provided me with many opportunities to gain a greater understanding of our community, often working collaboratively with our St. Charles City Council.

My professional career spans over 28 years' experience working in executive roles leading teams across the United States and Canada. My responsibilities have included topline and profit growth for 200+ locations contributing \$250 million in sales regionally, resulting in winning numerous awards for achieving results for the region. Key strengths are my ability to communicate goals and strategic initiatives, talent development, and executing change leadership through several multi-national billion-dollar corporations. I was recognized in numerous companies for my ability to build collaborative cross-functional business partnerships.

As your councilman, I will become your voice in St. Charles.

I am uniquely suited to help St. Charles move forward. My experience in leading business growth and my ability to work with diverse groups of people will be a valuable asset to the city council.

Top Priorities

-  Define an economic development plan for the future of St. Charles
-  Take a strategic approach in awarding the development of the former St. Charles Police station and surrounding property to create a cornerstone for our downtown riverfront
-  Advance the planning to improve recreational access to the Fox River in Downtown St. Charles

The opportunity to listen to you and those who make up the 4th Ward, to understand the important issues you feel will improve your lives and our community, is the essence of what responsive, effective local government should be all about. I believe it is a worthy goal and mission and it is what I intend to bring to our city council.
